Installation Order

The following is the installation order

Print the information below and follow the steps as you complete the Setup procedure during installation.

To install the software package, you must have access to an associated directory service. If you do not have a corresponding domain controller in your organization, select an appropriate option when you set up your first computer.

☐ **Step One**

Install the following components on <<ComputerName>>:
<<Component Name>>
<<Component Name>>
<<Component Name>>

☐ **Step Two**

Install the following components on <<ComputerName>>:
<<Component Name>>
<<Component Name>>

☐ **Step Three**

Install the following components on <<ComputerName>>:
<<Component Name>>
